# PROBE COVER

FOR GYNECOLOGICAL ULTRASONOGRAPHY

## TRANSDUCER PROBE COVER FOR VAGINAL ULTRASOUND

**CHECKUP** probe covers are purposely designed straight-walled, round-ended and with a smooth surface similar to condom but without the reservoir end that enables a better fit to the probe end to allow optimum transducer performance. Designed and manufactured for gynecological ultrasonography specifically to meet transducer probe cover specifications. Each probe cover is rolled for easy application to cover a variety of trans-vaginal transducers. 100 individually foil sealed probe covers in each dispenser box. Manufactured from high quality homogenised low allergy natural rubber latex.
